

Language Lab

Coordinator: Dr. Jyothirmayi. PC

Language Lab has 30 computer systems equipped with 'Orell – iTell' language lab software premium version installed. This special software enables a learner to learn Sanskrit, Hindi, Kannada, English and German. The highly effective LSRW method of language teaching is employed here. Any language learner gets an exposure to listen to the Native speakers. At the end of each module, self assessment is incorporated and the learner can practice the lessons repeatedly in case of requirement. Apart from the regular lab sessions, we conduct workshops, skill enhancement sessions etc.

Lab sessions conducted for Hindi/ Kannada students in 2017
