

ST. FRANCIS DE SALES COLLEGE

BANGALORE - 560 100

E-Governance Report

2014 – 2015

According to the need of the day, the governing council of St. Francis de Sales College decided to implement e-governance to better manage the institution for the academic year 2014-2015. The vendor was Integro Infotech and Consulting, Bangalore. The vendor provided the support for maintaining the college website.

For the academic year, the following modules implemented were

1. Website
2. Library

Website:

The college website supported the management through informing all the stakeholders about the college events, programmes provided and information about the institution. .

Library:

The library registered for the INFLIBNET resources and the KOHA software for the maintenance of the software was provided.

It was decided that the college will go for a ERP software in the next academic year to support more modules.

E-Governance Report

2015 – 2016

The college management decided to continue with the maintenance of the college website and the services provided by the Integro Infotech. In addition to it, OPTRA, an ERP software were also procured to support the functioning of the college.

The modules that were implemented were

1. Website
2. Library
3. Administration

Website:

The college website supported the management through informing all the stakeholders about the college events, programmes provided and information about the institution as in the previous year.

Library:

The library continued with the same modules updated in the previous year.

Administration:

The OPTRA app provided support to the organisation through maintaining attendance and sending messages to the parents. It also supported by maintaining time table and the marks of the students. It was decided that the services provided by OPTRA will be continued for the next year as well.

As the communication demands of the stakeholders are increasing and making the information from the college more accessible, the management has decided to have a college app, which will provide information to all the stakeholders. It was decided by the management that Integro Infotech solutions will provide the app service as well to the college and they have decided to sign a MOU regarding the same.

E-Governance Report

2016 – 2017

The management of St. Francis de Sales College started with the launch of the college App in this academic year. The college App could be accessible through the android platform and provided the necessary information to the students as well as parents and other stakeholders. The service provider was Integro Infotech.

OPTRA, ERP software which was used during 2015-2016 was continued and their services were utilized by the management.

The modules that were implemented were

1. Website and App
2. Library
3. Administration

Website:

The college website supported the management through informing all the stakeholders about the college events, programmes provided and information about the institution as in the previous year. The college app was also introduced.

Library:

The library continued with the same modules updated in the previous year. It was decided that online resources will be roped in for the future.

Administration:

The OPTRA provided support to the organisation through maintaining attendance and sending messages to the parents. It also supported by maintaining time table and the marks of the students as in the previous year.

Though OPTRA, the College Website and the College App provided support to the management through passing the needed information to all the stakeholders, the new developments

and the necessities could not be addressed.

In view of that the college management has decided to go for a complete ERP software in the next academic year and the vendors will be called for the same. The ERP software will be selected according to the requirements of the management and has to address the required modules such as Administration, Finance and Accounts, Examination and Admission. Based on these requirements the ERP partner will be selected.

E-Governance Report

2017 – 2018

The college management decided to update their e-governance resources and at the beginning of the year, vendors were called for the same purpose and Campus.technology were selected to be the ERP partner for the college. The college was using the ERP software provided by the selected vendor on a trail run for a year. The modules supported by the software was

1. Administration
2. Examination
3. Website and App
4. Library

Administration:

The Campus. technology provided the support in the areas of attendance, maintaining the staff and student data, conducting online classes, and providing certificate courses.

Examination:

The software provided support in the module of examination by maintaining the IA marks and providing the platform for conducting online assessments and exams internally for the students.

Website and App:

The website was updated every day and more information about the college was uploaded in the website. The college app reflected the website content.

Library:

The softwares procured during the previous years were extended.

All the stake holders were oriented on the usage of the software and the vendor supported the management by customizing the software to fit the needs of the college. The Vice Principal of the institution was the contact point for the vendors and all the enquiries and answers were received by Mr. Suman, Campus Technologies. The college management at the end of the year decided to

extend the contract with Campus Technologies and both the parties agreed on the same.

E-Governance Report

2018 – 2019

Campus Technologies continued to be the ERP partner of the institution and they provided support for the following modules:

1. Administration
2. Finance and Accounts
3. Student Admission and Support
4. Examination
5. Website and App
6. Library

1. Administration:

The campus.technology provided the support through various modules available on their platform. The customisation of the software was done according to the needs and support system was in place from the software side. Apart from that, the POSTO App service was also provided.

2. Finance and Accounts:

The new module was introduced where the campus.technology provided a payment gateway for the payment of fee for the students.

3. Student Admission and Support:

The ERP partner provided the platform for the online admission of the students.

4. Examination:

The software maintained the IA marks of the institution and also helped in the PO/CO output analysis.

5. Website and App:

The Website and App continued its service in providing information to the students and the other stakeholders.

6. Library:

More online databases was added to the library.

The Vice Principal of the institution was the person-in-charge from the management of the institution and Mr. Suman, the Director of Campus Technologies was the contact point from the software side. The POSTO app was also provided by the vendor and it was used by the students to access information and use it for various certificate courses and other courses.

The agreement was extended between the parties and Campus Technologies accepted to be the ERP partner of the institution along the agreed terms. The College Website and the Colloge App also continued to serve the management.
